To be a leader in Solutioning and Technology Integration for Carrier Grade Telecommunication and Networking Solutions requires IBIL to provide a reliable engineering services and support to our customers.

Through our processes driven work methods and attention to documentation. Our internal generated content from our implementations and deployment becomes a rich source of learning on the topic of build IP networking infrastructure. Generating internal content that has passed more than 1TB in size.

- IBIL is known for its structured support team which provides rooted services to their customers...
- We are highly focused on Engineering and Operation. We started our internal investment and resource development since the late 90's.
- Engineering services with broad knowledge, measured quality, committed performance and responsibility

We provide solid engineering strength in helping carriers and enterprise customers implement leading-edge technology in their core infrastructure and enabling technologies to deliver converged services to their internal and end-users.

Service Features and Benefits

To accomplish our hands on engineering projects we have made a substantial investment in test equipment and instrumentation. Our state-of-the-art equipment combined with our analytical skills uniquely qualifies us as an engineering services company. The staging and lab facility shows our thoroughness in providing good equipment to site. This is supported by the detail process, documentation, knowledge management referring to PMBOK.

Through our Project System/advanced IT solution reports should no longer be presented in a textual format; it should be graphical and interactive. Updates and status should be automatic and transparent. IBIL introduces the 1st ever an Online Program Management Portal in TM Projects also known as Enterprise Project Management System. Our experienced support team has a wide range of experience in this Telco industry. This caters the network operation activities for local, regional and global sites.
